Tel: 905-864-0773 Fax: 905-864-1947

All main and sub contractors  
for Hong Kong Mass Transit Railway

Dear Sirs,

Re: PG Bell Vitreous Enamel Panels

We are honored to know that PG Bell has once again been specified by the MTRC as an acceptable manufacturer of vitreous enamel panels for their planned new stations now under construction.

As you may aware, in the mid 80's during the construction of the Island line, PG Bell had successfully supplied to four (4) stations, viz. Sheung Wan, Central, Shau Kei Wan and Sai Wan Ho and again, in the mid 90's to Nam Cheong, Mei Foo and a number of other stations of lesser scope.

With full confidence, we look forward to continue supplying for your requirements for stations in the Tseung Kwan O Extension (Phase 2), West/South/North Island Lines, Kwun Tong Line extension and Sha Tin to Central Link.

We take this opportunity to introduce Sun Tech Architectural Products Co Ltd. STAP as our marketing representatives for the China, Hong Kong and Macau territories with effect from January 1, 2011. Please visit us in their website at [www.suntechap.com](http://www.suntechap.com). We look forward to the opportunity in providing you with our proven quality vitreous enamel panels and our best services through STAP.

Thank you for your kind attention.

Yours very truly,  
for PG Bell Porcelain
